

Scope Of Work

E360 Spanish to Commercial Division Site

Updated: 8/10/12

Project Goals: Add Spanish as a language option to commercial division site.

Executive Overview/Deliverables:

- 1) Registration form - Commercial Tire Specialist needs option for Spanish
- 2) Welcome screen for Commercial Tire in Spanish
- 3) Sub pages off of welcome screen should already be created for the Passenger/Light Truck Specialist (need to link to those)
 - Technical Help
 - Account Info
 - Test Progress
 - Etc...

Requirements:

1. Must be set up on the dev first for testing and then when we are ready to go live transfer it over.
2. All of the text for the welcome screen, tech help, account settings should already be translated into Spanish from when the PLT side was completed.

Deliverables Needed From Client:

1. Will have to send over the description that goes underneath the picture of the semitrailer for the right hand side navigation.
2. Will have to send us the url to where the links will go, but I think those are the only pages that need adjusted.

Notes:

1. The Passenger/Light Truck is already set up for reference.
