

Examination of the results of the regression analysis

1. The regression analysis results are shown below:

2. The regression equation is $\hat{Y} = 1.234567 + 0.567890X$.
3. The regression equation is $\hat{Y} = 1.234567 + 0.567890X$. The regression coefficient is 0.567890. The regression coefficient is the slope of the regression line. It represents the change in the dependent variable for a one-unit change in the independent variable.
4. The regression coefficient is 0.567890. The regression coefficient is the slope of the regression line. It represents the change in the dependent variable for a one-unit change in the independent variable.

QUESTION 1

Which of the following is a characteristic of a **public cloud** environment?

- A. It is managed by the user.
- B. It is shared across multiple organizations.
- C. It is located in a single geographic region.
- D. It is dedicated to a single user.

ANSWER: B

Explanation: Public cloud environments are shared across multiple organizations and are managed by the provider. They are typically located in multiple geographic regions and are not dedicated to a single user.

QUESTION 2

Which of the following is a characteristic of a **private cloud** environment?

- A. It is shared across multiple organizations.
- B. It is managed by the provider.
- C. It is located in a single geographic region.
- D. It is dedicated to a single user.
